

Crystal CHEMICALS

Introduction

Crystal chemical company limited was established on 18th November 1987. The objective of the company was to cater for the market potential for chemicals in the Kenyan region

Horticultural Chemicals

From cleaning to ornamental disease control, we offer the best available products.

Institutional Cleaning Chemicals

We have all your cleaning needs covered, including handwash, menthol crystals

Aviation Cleaning Products

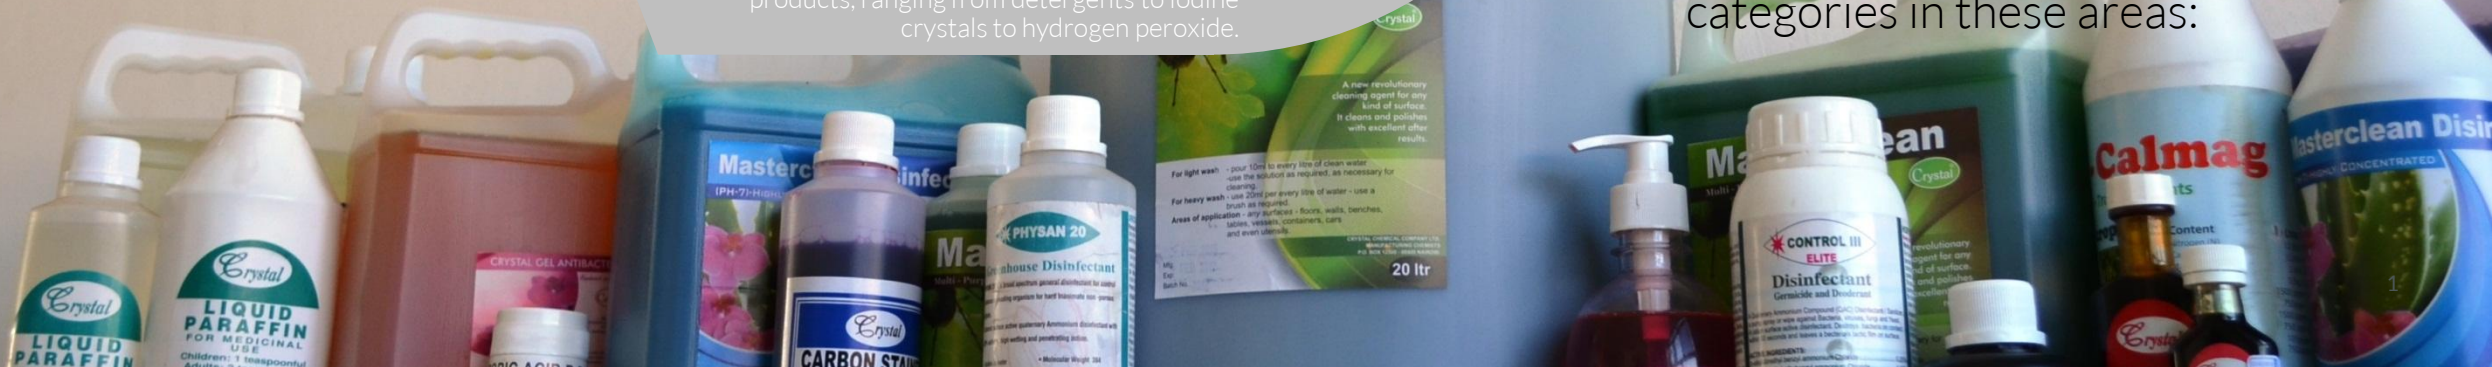

We offer solutions for aircraft engine cleaning as well as cabin maintenance for a wide variety of surface types.

General Cleaning Products

We manufacture a wide variety of sanitation products, ranging from detergents to iodine crystals to hydrogen peroxide.

The Business

Over the years crystal chemical company limited supplies chemicals to many outlets mainly to specialized technical users of various categories in these areas:

Horticultural Products

We are the sole suppliers of physan 20 in east & central Africa. It is a class leading multipurpose landscape and ornamental disease control product.

Aviation Products

We supply industry tested aviation cleaning products for use on engines and various metal surfaces.

Institutional Products

Our promise is a cost effective product that cleans better than other locally available brands.

General Application Products

We engineer multi-purpose cleaning agents that have no run-off restrictions in the form of fungicides and drain cleaners.

Specialized Products

We offer tailor-made solutions for specific surfaces as well as free professional advice on all our products.

We have a variety of specially engineered products for a wide array of applications.

Physan 20

This is a multipurpose landscape and ornamental disease control product with an impressively wide application array.

Use on water features

Algae and odor control; fountains, birdbath, water gardens, pools.

Use on stone surfaces

Algae control on bricks, walls, walkways, statuary and other hardscapes surfaces.

Application on fauna

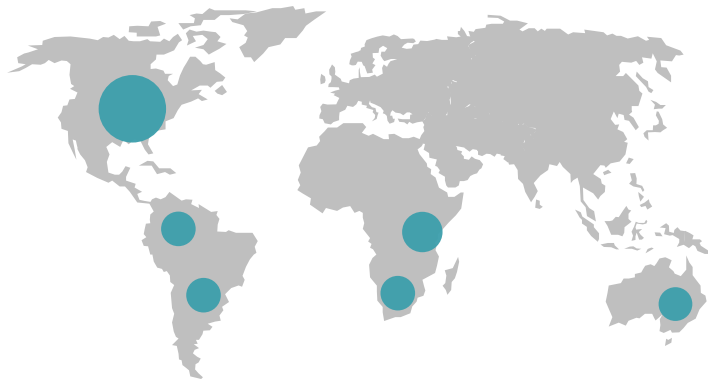

Diseases prevention and control on a variety of ornamental plants including orchids, roses, violets, lawns, more.

Why you should consider Physan 20

It is easy to mix and apply as well as cost effective and environmentally friendly. Physan 20 is also bio-degradable with no run off restrictions.
